

Module 5: Exercise 1 Jeopardy Planning

Jamie J Williams

Ivy Tech Student

SDEV 120 – Logical Thinking

Marty Frankenstein

07/12/2026

Necessary Components:

1. Round Timer –
 - a. Set for round 1- 12 minutes
 - b. Reset for Round 2 – 12 minute duration
 - c. Reset for Round 3.(1 minute duration)
2. 6 Categories – Round 1
 - a. AI generated answers for 5 questions per each of 6 categories submitted
 - b. Loading of Jeopardy board for selection of answers
 - c. Programming of the 2 jeopardy questions
 - d. Jeopardy questions notification music/sound
 - e. Double Jeopardy answer timing
 - f. Question count down timer for replying to question
 - g. Buzzer 1st, 2nd and 3rd assignments based upon who pressed buzzer 1st
3. 6 Categories – Round 2
 - a. Same as Round 1 only with different categories and AI generated answers for round 2
4. 1 Question – Final Round
 - a. Music played why contestants answer question.
 - b. Timer duration for answering question
 - c. Time duration for writing down bet and storing the bet as read only
 - d. Winnings captured.
5. 3 contestants
 - a. 3 microphones
 - b. Winnings board
 - c. 3 buzzers
 - d. 3 electronic pads to write down bet – ability to distinguish between contestants and display on screenr
 - e. 3 e;ectronic pads to write down answer to final question and lock in after time limit to prevent writing after buzze and display on screenr
6. 1 moderator
 - a. 1 microphone
 - b. 1 buzzer
7. 61 total questions
 - a. AI generates
8. Mediators
 - a. Adjust contestant winnings based followup question award or contested answer (winnings added or subtracted based upon situation)

9. 13 categories, 6-1st round, 6 -2 round, 1 final round – predetermined by Jeopardy writers and submitted to Jeopardy screen for programming categories (columns)

10. 3 buzzers to signal who gets to answer 1st

- a. **Buzzer lock out logic**
- b. **Buzzer Priority scheme**
- c. **Buzzers not locked out**
- d. **Moderator buzzer prioritization and impact on contestant buzzers**

11. **Rules of the Game:** Capture end user requirements (Mediator, Contestant, Moderator)

- a. 1st person to ring buzzer gets 1st chance to answer questions—**need 3 buzzers, with means to capture who buzzed 1st Buzzer lock out logic**
- b. IF 1st person answers incorrectly, next person in line get chance to answer question – **need means to capture sequencing of which buzzer was pushed within the sequence pushed. Buzzer Priority scheme**
- c. If 1st 2 people wrong, last contestant gets chance to answer question – **capture how much money was awarded per answered question. – Contestant winnings screen**
- d. Whoever answers question correctly, gets to choose next category and question. – **Response to Category. Question selection by revealing question to all contestants simultaneously and buzzers not locked out. Moderator tracks who are up to verbally choose category and**
- e. There are 2 double Jeopardies per round and person who selected the question gets to risk what ever money they designate and opportunity to answer the question without competing against contestants. – **Amount of bet needs to be entered into and used in formula to add or subtract from current winnings based upon if question was answered correctly.; otherwise, the amount of money is fixed during regular questions. Track and update winnings per contestant**
- f. Each contestant has 10 seconds to answer their question before they time out and the next contestant in the queue gets to answer(ask). – **Timer and buzzer required. Method to determine if answer occurred within time. Timer for Round 1, Timer reset for Round 2, 4 Buzzers – 1 for each contestant and one for Moderator when time expires; Timer Logic. Buzzer Logic**
- g. Prior to the start of round 1, one of the 3 contestants won the right to be 1st person to select 1st category and question - **Moderator**

- h. Rules A through F apply to Round 1 and Round 2. (**Decision Round 1 or 2, then Loop to support execution of the game until time expires OR there are no questions left**)**Making the selection visible**
- i. Person who gets to start Round 2 is the person who has the least monetary wins from round 1- **Moderator role**
- j. The final round question, every contestant with a positive award amount can answer the final question. **– Contestant Role**
- k. The Final round each contest can bid however much money they have won.
- l. After contestant answers the question (in question format), they show how much money they bet and if they answer the question correctly , that amount is added to their total amount won **. – Contestant Role**
- m. Contestant at the end of the game wins the game. **– Moderator and Contestant**
- n. Winning Contestant can return a total of 5 times consecutively to attempt to win subsequent Jeopardy contests. **. – Contestant Role**
- o. There is no arguing about the question decision whether the answer was correct or not during the game. **. – Contestant Role**
- p. There will be at least 5 commercials during the game to annoy anyone watching the game on TV **. – Contestant Role and Moderator.**
- q. 6 Categories for Round 1 will be : Logical Thinking, Flowcharts, **- AI and Jeopardy Programmer**
- r. Each of the 5 questions will increase in value from Top question to bottom question by \$100.00 with the 1st question starting the sequence at \$100.00. So, the 5th question will be \$500.00. **- AI and Jeopardy Programmer**
- s. The Six categories for Round 2 will be : Bible Trivia, Logical Thinking, Rods, Reels, Hooks, Lines, Sinkers. **- AI and Jeopardy Programmer**
- t. Before the final round starts the contestants will write the amount, they are betting that they will answer the question right on a touch screen and the answer will be saved for display they have provided the answer to the question—when prompted to answer by the mediator. **– Electronic pad to capture bid and stored in computer for display.**
- u. The final question, the contestants will be given 1 minute to write down their answer in the form of a question. **Music program, Timer Countdown, Contest 2nd electronic pad to capture question to the answer.**
- v. Given the Round 1 Categories, AI will be asked to provide the 30 answers for Round 1 categories, 30 answers for Round 2 categories and the Final answer **. - AI and Jeopardy Programmer**

- w. Jeopardy mediator will determine if contestant responses are correct or not and mediate the winnings. **Winnings screen manual override** .
 - x. Failure to answer the “question” in the form of a question will disqualify the contestant from that question and the next person to ring in will be given the opportunity to answer in the form of a question. **Buzzer lockout, mic control**
12. Based upon actions determined by above requirements, group requirements
13. Based upon groupings determine modularity of implementation.
